WORK EXPERIENCE

Leat (previously known as Piggy)   Nov. 2023 – Present
Software Engineer   *Utrecht / Prague · Hybrid*

- Leat is a global leader in CRM and loyalty solutions, driving customer engagement and retention through innovative technology.
- Developing full-stack solutions using Laravel and React for high-impact business applications.
  - **Stack:** Laravel; React; Tailwind CSS; MySQL
- Redesigned and rebuilt the Piggy API and PHP SDK, enabling seamless integration with customer websites and POS systems, significantly improving ease of implementation and user experience.
- Designing and implementing user-friendly interfaces with React and Tailwind CSS.
- Optimizing code for performance and scalability.
- Collaborating with UI/UX and marketing teams to deliver seamless project execution.

Awoostria - Volunteer position   July 2023 – Present
Head of Technology & Board Member   *Vienna · Hybrid*

- Awoostria, a non-profit organization dedicated to organizing the biggest annual furry convention in Austria that brings together fans of anthropomorphic art, culture, and performance.
- Head of Technology, overseeing all development tasks for Awoostria's custom projects and services, from concept to launch.
- Developed and launched Awoostria's fully custom attendee registration & payment system, surpassing industry standards among furry conventions, improving user experience and operational efficiency for hundreds of daily users and volunteers.
  - **Stack:** Laravel; Livewire; Tailwind CSS; Alpine.js; MySQL
- Managed all on-site IT systems, including Awoostria's registration system, ensuring the efficient check-in of approximately 700 attendees in under 5 hours.
- Responsible for managing all infrastructure, DevOps and IT systems.

Digital Impact   Feb. 2023 – Nov. 2023
Software Engineer   *Remote*

- Digital Impact specializes in digital transformation and web development, combining strategy, design, technology, and marketing to deliver innovative solutions that drive business growth across various industries.
- Developed back-end services and APIs with PHP and Laravel for client projects.
  - **Stack:** Laravel; PHP; Symfony; jQuery; MySQL
- Responsible for managing and extending Cusweb, their in-house employee, customer, and project management system.

The Dev Squad   Jun. 2022 – Dec. 2022
Software Engineer   *Remote*

- The Dev Squad provides web and software development services to diverse clients, with a focus on customizable solutions.
- Developed scalable and efficient back-end solutions for Hartje Wonen using Laravel, seamlessly integrating with front-end technologies to enhance performance and user experience.
  - **Stack:** Laravel; Symfony; Vue.js; Inertia.js; MySQL

This is Development B.V.   **Jan. 2020 – May. 2022**
Back-end Developer   *Utrecht, Netherlands · Hybrid*
- This is Development B.V. is a tech company focused on providing innovative back-end solutions and technical expertise to their clients. One of its biggest clients is FrieslandCampina, with which I was in constant contact.
- Contributed to multiple projects as a Back-end Developer Intern, then Junior Developer, and later advancing to Back-end Developer.
    - **Stack:** Laravel; Vue.js; GraphQL; MySQL
